Dear Professor,

I hope this email finds you well. I am writing to ask for your clarification on the **scope of the Business Data Management Project.**

As I understand it, the project involves the analysis of data collected from **an Industry/ Business outside the government**. However, I was wondering if it would also be **possible to approach an NGO or a Government Entity for the project.**

I ask because I believe that there may be valuable insights to be gained from analyzing data from these types of organizations, and I would like to explore this possibility if it is within the scope of the project.

I would greatly appreciate it if you could provide some guidance on this matter. Thank you in advance for your time and consideration.

Sincerely,
Abhinav Sonone
Student
BS Data Science-IITM

Hi Abhinav,

Yes as long as you are able to identify a problem and get data to solve it. But the data should be primary in nature.

You can share once u get some leads and we can discuss further.

Dear Professor,

Thank you for your prompt reply and valuable guidance on the scope of the Project.

I am very grateful for this opportunity and I am excited to begin exploring the possibilities for our project. I look forward to discussing this further with you **once I get all the necessary approvals and permissions**.

Thank you again for your support and guidance.

Sincerely,
Abhinav Sonone
